EPC Living quarters and helideck

On April 6th, 1995 Leirvik Module Technology was awarded the EPC subcontract for delivery of the living quarters and helideck for Norsk Hydro's Njord Floating Production Unit.

Njord was Leirvik Module Technology's

first project after the NORSOK reports were issued, and a lot of effort was put into reducing time and costs in order to comply with the reports. Throughout the tendering phase, the engineering, construction and procurement departments conducted thorough

examinations of previous deliveries/projects, enabling us to highlight where we could save time and money. Based on this work we succeeded in winning the subcontract.

Njord

Name of Client: Aker Stord / Norsk Hydro
